Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/610,768

Applicant(s)

ALBERTH ET AL.

Examiner

Tuan A. Tran

Art Unit

2682

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 23 August 2005.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1,2,4-24 and 26-30 is/are pending in the application.
- 4a) Of the above claim(s) _____ is/are withdrawn from consideration.
- 5) ☒ Claim(s) 5-10,14-24,27 and 30 is/are allowed.
- 6) ☒ Claim(s) 1,2,4,11-13,26,28 and 29 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
- Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
- Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. _____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).

* See the attached detailed Office action for a list of the certified copies not received.

DETAILED ACTION

Applicant's request for reconsideration of the finality of the rejection of the last Office action is persuasive and, therefore, the finality of that action is withdrawn.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1-2, 13, 26 and 29 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alpert (5,742,666) in view of Balachandran (6,073,004).

Regarding claims 1-2 and 13, Alpert discloses a method of sending a message stored in memory associated with a wireless device 54 (See fig. 3A), the wireless device 54 including a microphone 60, the method comprising the steps of: initiating a call from the wireless device (See fig. 3A and col. 3 lines 36-41, col. 5 lines 12-15); sending the stored message from the wireless device and sending position data from the wireless device after a call is established (See col. 5 lines 15-20, col. 5 line 55 to col. 6 line 5); and terminating sending the stored message when a key of the wireless device is activated (See col. 5 lines 20-23, col. 6 lines 43-49, col. 10 lines 40-46). However, Alpert does not mention the step of sending the stored message when a predetermined time has elapsed on a timer wherein the timer is initiated when the call is established. Balachandran teaches a system and method for transmitting emergency request

Art Unit: 2682

message wherein a timer 35 is applied to delay a transmission of stored message before an emergency call is established (See figs. 2-3 and col. 2 line 54 to col. 3 line 6). Since both Alpert and Balachandran teach about system and method for sending out emergency request; therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the teaching of timer function of Balachandran in delaying to send the stored message to the receiving party from the wireless device as disclosed by Alpert in different stages of the process such as before or after the call is established for the advantage of allowing users to abort the request if no emergency assistance is necessary as well as minimizing inadvertent or mistaken service request.

Claims 26 and 29 are rejected for the same reasons as set forth in claim 1, as apparatus.

2. Claim 28 is rejected under 35 U.S.C. 103(a) as being unpatentable over Alpert (5,742,666) in view of Balachandran (6,073,004) as applied to claim 26 above, and further in view of JP 08251313.

Regarding claim 28, Alpert & Nichols discloses as cited in claim 26. However, they do not mention the controller if further program to terminate transmission of the stored message when a voice signal is picked-up by a microphone of the wireless device. JP 08251313 suggests an apparatus 1 capable of transmitting an audio signal and a data signal to a transmission line wherein the apparatus stops transmission of data signal when the audio signal is detected by a tone voice detector (See fig. 1 and

the English Abstract). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the suggestion of JP 08251313 in modifying the wireless device as disclosed by Alpert & Nichols such that the device stops transmission of the stored message when audio signal (voice signal) is detected for the advantage of allowing the user to speak directly to the called party when the user is capable.

3. Claims 4 and 12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Alpert (5,742,666) in view of JP 08251313.

Regarding claims 4 and 12, Alpert discloses a method of sending a message stored in memory associated with a wireless device 54 (See fig. 3A), the wireless device 54 including a microphone 60, the method comprising the steps of: initiating a call from the wireless device (See fig. 3A and col. 3 lines 36-41, col. 5 lines 12-15); sending the stored message from the wireless device after a call is established (See col. 5 lines 15-20). However, Alpert does not mention the steps of monitoring the microphone for audio signals and terminating sending the stored message when an audio signal is picked-up by the microphone of the wireless device. JP 08251313 suggests an apparatus 1 capable of transmitting an audio signal and a data signal to a transmission line wherein the apparatus stops transmission of data signal when the audio signal is detected by a tone voice detector (See fig. 1 and the English Abstract). Therefore, it would have been obvious to one of ordinary skill in the art at the time the invention was made to apply the suggestion of JP 08251313 in reconfiguring the wireless device as disclosed by Alpert

with the tone voice detector such that the device stops transmission of the stored message when an audio signal (a voice signal) is detected for the advantage of allowing the user to speak directly to the called party when the user is capable.

4. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Alpert (5,742,666) in view of Ebata et al. (6,487,542).

Regarding claim 11, Alpert discloses a method of sending a message stored in memory associated with a wireless device 54 (See fig. 3A), the wireless device 54 including a microphone 60, the method comprising the steps of: initiating a call from the wireless device (See fig. 3A and col. 3 lines 36-41, col. 5 lines 12-15); sending the stored message from the wireless device after a call is established (See col. 5 lines 15-20). However, Alpert does not mention that the data message including a digital signature. Data message having digital signature is well known in the art as suggested by Ebata (See col. 10 lines 5-11). Therefore it would have been obvious to one of ordinary skill in the art at the time the invention was made to have included digital signature, as Ebata's suggestion, into the transmitted data message as disclosed by Alpert in order to enhance the validity of the message.

Allowable Subject Matter

5. Claims 5-10, 14-24, 27 and 30 are allowed.

The following is an examiner's statement of reasons for allowance:

The reasons for allowance of claims 5-10, 14-24, 27 and 30 have been indicated in Office Actions mailed on 04/23/2003 and 10/09/2003 respectively.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Response to Arguments

Applicant's arguments, see Appeal Brief, section VII, filed 08/23/2005, with respect to the rejection(s) of claim(s) 1, 2, 4, 11-13, 26, 28 and 29 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made.

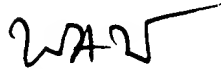

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Tuan A. Tran whose telephone number is (571)272-7858. The examiner can normally be reached on Mon-Fri, 10:00AM-6:30PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Quochien Voung can be reached on (571)272-7902. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
